

PROZURA
Construction Chemicals Pvt. Ltd.
Concrete Solutions

PRODUCT LIST

ProZura Construction Chemicals Pvt. Ltd. is a company with innovative technology and advanced construction chemical and allied products offering leading edge to the construction industry.

Our aim is to contribute actively in improving productivity, continuous innovation, R & D and solution centric customer satisfaction. The products we offer provide the customer with maximum value in performance, quality, comfort, safety, flexibility and overall economy. Our operation focuses on products and solutions with high technology content that offer customer a distinct added value.

Innovation- ProZura will constantly innovate / invest in R&D to achieve the stated goals and fulfill commitment to all including the environment and society.

Our repertoire - ProZura product range includes concrete admixtures, grouts, repairs, waterproofing, protective coating, surface treatment, sealant and adhesive, resin and cementitious capsule, hooked steel fiber at our manufacturing plant Vasai with the state-of-the-art machinery.

Green technology - ProZura is making significant effort in development of products with optimum usage of cement.

Natural fillers and recommends minimum water usage during application to save natural resources.

Packing innovation - using re-cyclable material and alternative products is on priority.

High performance innovative solution - ProZura will continuously interact with customers in order to deliver high performance products and service to ensure that customer and business associates feel the ferish with our association.

RANGE OF PRODUCTS

ADMIXTURES

ZURAPLAST GF : Water reducing & retarding cum slump retaining superplasticiser for concrete

ZURAPLAST GFH : High range water reducing cum retarding super plasticiser for concrete

ZURAPLAST GFM : High range water reducing, retarding cum slump retainer superplasticiser for concrete

ZURAPLAST PC-30 : High range water-reducing and long term dispersibility retention hyperplasticiser based on Polycarboxylic Ether technology.

ZURAPLAST PC-40 : Polycarboxylic Ether based high range water reducing and long term dispersibility retention cum concrete fluidity enhancer hyperplasticiser.

ZURAPLAST PC-50 : Polycarboxylic Ether based high range water reducing cum concrete fluidity enhancer and long term dispersibility superplasticizer with premix viscosity modifier agent.

ZURAPLAST-PM : Mortar plasticiser, is supplied as an off-white to pale yellow liquid which mixes readily with water in any proportions.

GROUTS & ANCHORS

ZURAGROUT GP : Non shrink, free flow cementitious grout in powder form for gap pouring.

ZURAMIX 100 : Hydrogen free, non shrink polymeric plasticized grouting admixture for Injection grouting in powder form.

ZURAINJECT LVEG : Two pack, low viscosity epoxy injection grout for crack sealing in concrete and to restore structural integrity.

ZURAFIX R : High early strength polyester resin based capsule/grout with specially selected non-reactive fillers for roof/crown rock bolting.

WATERPROOFING

ZURAPROOF WL : Normal setting integral waterproofing compound with plasticizing properties in liquid form to make concrete waterproof, Conforms to IS: 2645-2003

ZURAPLUG : Rapid setting & hardening, chloride free compound for plugging & sealing of leaks from concrete, brick wall etc.

ZURACRETE - WP : Single component acrylic polymer for cement based waterproofing.

ZURAFIBRE FLEX : High performance elastomeric cementitious fibre reinforced waterproofing system

ZURAFLEX 300 : Ultra flexible two-component cementitious waterproofing system

ZURADEC 300 : Single component, elastomeric, uv resistant waterproof coating

ZURAFLEX : Acrylic polymer reinforced cementitious membrane coating for concrete & masonry surfaces.

ZURASEAL - WP : Penetrating waterproofing repellent primer for concrete

PROTECTIVE COATINGS

ZURACOAT : Aliphatic acrylic resin based water repellent clear coating for exterior exposed surfaces

ZURACOAT - PU : Two component clear aliphatic polyurethane protective coating over stone, concrete surface etc.

ZURAZINC - P : Two component low viscosity epoxy resin based zinc rich primer.

ZURAPRIME : Acrylic, water based & weatherproof exterior emulsion

ZURACOAT 300 : Water based aliphatic acrylate elastomeric protective coating for walls

ZURATREAT - RR : Cleaning, etching and rust removing agent

ZURA WALLPUTTY : White cement based product with additives for application on Interior and Exterior walls.

ZURA EMULSION : Water based modified acrylic emulsion paint for Interior & Exterior walls.

SURFACE TREATMENTS

ZURACURE WB : Ready to use, waxes base curing compound for concrete.

ZURALEASE : Natural organic chemicals base highly concentrated mould release agent.

ZURALEASE OB : Ready to use specially formulated mineral oil based mould release agent in sprayable consistency for assured high quality surface finish.

ADHESIVES

ZURABOND EP : Two pack solvent-less epoxy bonding adhesive.

ZURABOND SBR : SBR polymer for concrete repairs, bonding old to new concrete etc.

ZURABOND SBR LATEX : SBR latex polymer for concrete repairs, bonding old to new concrete etc.

ZURABOND SBA : Thixotropic epoxy resin adhesive for bonding of segmental joints.

ZURABOND AR : Single component acrylic based emulsion

ZURABOND AR (STD) : Single component acrylic based

INDUSTRIAL FLOORINGS

ZURAFLOORTOP : Metallic compound for abrasion resistant & longwearing floor surface.

ZURAFLOORTOP E : Non-Magnetic floor hardener for Industrial flooring & topping.

ZURAFLOORTOP STD : Ready to use non-metallic floor hardener for industrial flooring & topping.

CONCRETE REPAIR

ZURACON MC40 / MC70 / MC80 : Non-shrink, general purpose cementitious micro concrete.

ZURACON RM40 / RM70 : Cementitious structural grade fibre reinforced repair mortar.

ZURACRACKFILL Grey : Polymer modified cementitious crack filling.

ZURACRACKFILL White : Polymer modified cementitious crack filling.

SEALANTS

ZURASEAL PG : Gun grade, polysulphide based joint sealants.

ZURASEAL GG : Pouring grade polysulphide based joint sealants.

ZURASEAL - CS : Flexible acrylic fibre reinforce crack sealer

TILE ADHESIVES & TILE GROUTS

ZURATILEFIX : Single pack polymer modified cementitious base tile adhesive.

ZURATILEFIX ULTRA : Single pack tile adhesive for wall & floor area.

ZURAFILL TG : Polymer modified tile joint grout.

ZURAFILL EPW : Epoxy resin based tile joint grout.
