

## PRODUCT DESCRIPTION

ZURABOND-HACKFREE is a combination of acrylic polymer and other additives which is used as bonding agent between plaster and old concrete or new concrete.

## USES

- ▶ As bonding agent between plaster and concrete.
- ▶ As bonding agent between concrete and tiles.

## ADVANTAGES

- ▶ Excellent bond strength.
- ▶ Water resistance properties.
- ▶ Non-ionic, hence no possibility of attack on concrete by chlorides, sulphates and alkalis.
- ▶ No need of hacking is required; straight away can be applied on walls.
- ▶ Does not have any corroding effect on the reinforced steel.

## APPLICATION

### Surface Preparation:

All surface should be dry and free from contamination such as oil, grease, loose particles, decayed matter, moss, algae growth, laitance, and all traces of mould release oils and curing compounds. This is best achieved by thoroughly surface preparation.

Once the surface is ready moisten with water. On the entire clean moist surface apply a coat of ZURABOND-HACKFREE by spray or brush.

When the film becomes tacky apply a coat of readymade plaster / mortar in 10 minutes. Tacky period may vary depends on ambient temperature. Ensure that the surface is tacky before application of plaster/ mortar.

## ESTIMATING

### Coverage

10 m<sup>2</sup>/Litre on a smooth surface

### Packaging

Available in 1, 5 & 20Kg

### Shelf Life

12 months from the date of manufacturing if stored in original packing under shed at normal ambient temperature.

## HEALTH & SAFETY
